### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: None of the prior art discloses or renders as obvious a second connection means including a resilient anchor member being at least partially compressed when a thrust flange is seated upon a thrust seat for substantially constraining an adapter insert and socket against relative movement in addition to other elements of structure claimed. The argument that it would not be obvious to place a compressible rubber material as shown in Desbiolles at the bottom of the socket of Palmer is disagreed with. Rubber stoppers are commonly used to stop moving objects. However based on the arguments the examiner has determined a block of rubber does not meet the element of structure of an anchor means since a block of rubber compressed would not fix (anchor) an insert to a socket.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### **Conclusion**

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Somero discloses a rubber stop (66) for a moving rod.
